DECISION

**TOPIC ITB Application Maintenance and Enhancement Contract with
Alliance Technologies**

The Department requests the Commission to approve a contract with Alliance Technologies to provide application maintenance and enhancement support to the Department's Information Technology Bureau (ITB). The contract shall terminate by June 30, 2008 and shall not exceed \$48,000.

The Department uses over 100 different applications, most of which were developed by an outside vendor, and ITB does not have staff resources in place for application development and maintenance for all of these applications. The current practice is for bureaus in need of assistance to contract separately with vendors to provide these services. Not only can these individual processes take time, but they do not allow the Department to take advantage of economies of scale by providing vendors more work. This current contract will allow the Department to have the appropriate support resources available on an "as needed" basis and will guarantee better oversight of this work with input from ITB.

The Department shall pay Alliance Technologies at a rate not to exceed \$80 per hour, for not more than 600 hours. Program bureaus will be responsible for paying for the services from their own budgets.

Ten companies responded the RFP to provide C# .Net, Microsoft Reporting Services and SQL Server 2000 development services. After review of the resumes by a team of three ITB staff, three companies were selected for interviews. ITB selected two different companies with varying types of expertise to be able to address the complete needs of the Department. This contract represents one of those two recommended for award.
